AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application:

1   1.   (Previously Presented) A processor-implemented method, comprising:

2   receiving a call request over a network from a network entity associated with a

3   calling party to establish an interactive call session;

4   based on data contained in the call request, looking up information about the

5   calling party;

6   receiving the information about the calling party in response to looking up the

7   information about the calling party; and

8   providing the received information about the calling party in the call request.

1   2.   (Original) The method of claim 1, wherein receiving the information comprises

2   receiving the information from a storage device.

1   3.   (Original) The method of claim 2, wherein receiving the information from the

2   storage device comprises receiving the information from a database stored in the storage device.

1   4.   (Previously Presented) The method of claim 3, wherein looking up the

2   information about the calling party comprises looking up the information in the database using

3   structured query language messages.

1   5.   (Previously Presented) The method of claim 1, wherein providing the received

2   information comprises adding the received information in a body portion of the call request.

1   6.   (Previously Presented) The method of claim 5, wherein providing the received

2   information comprises using at least one of a Session Initiation Protocol control gateway

3   interface and Session Initiation Protocol servlet.

1   7.   (Previously Presented) The method of claim 6, wherein providing the received

2   information comprises updating a content-type field of the call request in response to adding the

3   received information to the body portion of the call request.

1   8.   (Original) The method of claim 7, wherein updating the content-type field

2   comprises updating the content-type field to a multipart/mixed type.

1   9.   (Previously Presented) The method of claim 6, wherein providing the received

2   information comprises updating a content-length field of the call request based on at least the

3   received information added to the body portion of the call request.

1   10.   (Previously Presented) The method of claim 1, further comprising forwarding the

2   call request containing the received information to a presentation device.

1   11.   (Previously Presented) The method of claim 1, wherein providing the received

2   information comprises providing the received information as Multipurpose Internet Mail

3   Extensions type.

1   12.   (Previously Presented) The method of claim 11, wherein providing the received

2   information comprises providing the received information in the call request having portions

3   according to one or more of formats selected from the group consisting of a Session Description

4   Protocol, an audio format, a video format, a web page format, and an electronic mail format.

1   13.   (Previously Presented) The method of claim 1, wherein receiving the call request

2   comprises receiving a Session Initiation Protocol message, and wherein providing the received

3   information comprises providing the received information about the calling party in the Session

4   Initiation Protocol message.

1   14.   (Previously Presented) The method of claim 13, wherein receiving the call

2   request comprises receiving an Invite request, and wherein providing the received information

3   comprises providing the received information about the calling party in the Invite request.

1   15.   (Original) The method of claim 1, wherein receiving the call request comprises

2   receiving a call request to establish a real-time, interactive call session between the calling entity

3   and the called party.

1   16.   (Previously Presented) The method of claim 1, further comprising determining a

2   type of the received information and initiating a corresponding application to process the

3   received information.

1   17.   (Original) The method of claim 16, wherein initiating the application comprises

2   executing a web browser application.

1   18.   (Previously Presented) The method of claim 1, wherein providing the received

2   information comprises providing the received information that is in a Multipurpose Internet Mail

3   Extensions format selected from a group consisting of Java Enhanced Session Initiation Protocol,

4   Hyper Text Markup Language, and Extensible Markup Language.

1   28.   (Canceled)

1   29.   (Canceled)

1   30.   (Canceled)

1   31.   (Canceled)

1   32.   (Canceled)

1   33.   (Previously Presented) An article comprising at least one machine-readable
2   storage medium containing instructions that when executed cause a system to:
3   receive a first call request from a first network entity over a network to establish a
4   call session with a second network entity;
5   look up calling party information based on data contained in the first call request;
6   and
7   generate a second call request to the second network entity, wherein the second
8   call request contains the calling party information.

1   34.   (Original) The article of claim 33, wherein the at least one machine-readable
2   storage medium contains instructions that when executed cause the system to receive a Session
3   Initiation Protocol message.

1   35.   (Original) The article of claim 34, wherein the at least one machine-readable

2   storage medium contains instructions that when executed cause the system to receive a Session

3   Initiation Protocol Invite message.

1   36.   (Original) The article of claim 35, wherein the at least one machine-readable

2   storage medium contains instructions that when executed cause the system to include at least a

3   portion of the contents of the first call request within the second call request.

1   37.   (Previously Presented) An article comprising at least one machine-readable

2   storage medium containing instructions that when executed cause a system to:

3   receive a request from an entity to establish a call session, the request having a

4   header portion and a body portion;

5   look up information regarding purchases of a calling party in response to

6   receiving the request; and

7   provide the information regarding purchases of the calling party in the body

8   portion of the request.

1   38.   (Previously Presented) The article of claim 37, wherein the instructions when

2   executed cause the system to provide the information regarding purchases of the calling party by

3   adding the information regarding purchases of the calling party to the request using one of a

4   Session Initiation Protocol control group interface and Session Initiation Protocol servlet.

1   39.   (Canceled)

1   40.   (Canceled)

1   41.   (Previously Presented) The method of claim 1, wherein looking up the

2   information about the calling party comprises looking up information regarding purchases of the

3   calling party, and wherein providing the received information comprises providing the received

4   information regarding purchases of the calling party in the call request.

1   42.   (Canceled)
